Email: ankush3985kvponda@gmail.com
Mobile: [+91-9053107291](tel:+91-9053107291)

SKILLS

Languages: Python, Java, JavaScript, PHP
Tech Stack: HTML5, CSS, React.js, Node.js, Express.js, REST APIs, Socket.io, Springboot
Tools/Frameworks: Git, GitHub, Vercel, Multer, Render, Postman
Soft Skills: Problem Analysis, Critical Thinking, Logical Decision-Making, Punctuality

PROJECTS

Mini Crowd Management System (CLI) | [GitHub](#) Jul2025–Aug2025

- Designed a command-line based crowd monitoring system using Node.js to efficiently manage and track crowd levels across multiple locations.
- Implemented HashMap-based data handling enabling O(1) lookup and updates, dynamic sorting, and real-time crowd status classification.
- Delivered a lightweight, database-free CLI tool improving speed, usability, and accuracy for quick crowd assessment.

AI-Based Institutional Performance Evaluation System | [GitHub](#) Oct2025–Nov2025

- Developed a full-stack backend API that automates institutional scoring using AI-driven evaluation, risk analysis, and intelligent recommendations.
- Built a secure Node.js + Express + MongoDB architecture with JWT authentication, RBAC, modular controllers, and Mongoose-based data models.
- Achieved automated performance insights through weighted algorithms that analyze approvals, compliance, infrastructure, faculty performance, and historical trends.

TRAINING

MERN Stack Internship | Emertxe / WebStack Academy Dec 2025 – Present

- Industry-oriented internship focused on developing production-grade, scalable full-stack applications and strengthening real-world software engineering practices.
- Working with the complete MERN technology stack — MongoDB, Express.js, React.js, Node.js — including APIs, authentication, deployment workflows, cloud services, and backend architecture.

Programming and Data Structures Training | Lovely Professional University Jul 2025 – Aug 2025

- Built strong foundations in structured programming, logic-building, and problem-solving required for software development roles.
- Hands-on practice in C, C++, and Python with implementation of core DSA concepts such as arrays, linked lists, stacks, queues, trees, and graphs.
- Improved algorithmic thinking, code optimization skills, and competitive-programming style accuracy and speed.

CERTIFICATES

- Cloud Computing | [NPTEL](#) Sept 2025
- LINUX Operating System | [Udemy](#) Oct 2024
- Introduction to Hardware and Operating System | [Coursera](#) Aug 2024
- Digital Systems: Logic Gates to Processors | [Universitat Autònoma de Barcelona \(UAB\)](#) Mar 2024

CO-CURRICULAR ACTIVITIES

- Demonstrated leadership and discipline as an NCC Cadet, actively engaging in drills, field training, and national-level military exposure programs.
- Participated in hackathons, enhancing skills in UI/UX design, team-based problem-solving, and integrating CI/CD pipelines into functional prototype workflows.

EDUCATION

Lovely Professional University,Phagwara,Punjab Aug 2023—Present
B.Tech – Computer Science and Engineering
CGPA: 6.3
PM SHRI Kendriya Vidyalaya Ponda, Goa Apri 2021– Mar 2022
Intermediate
